

Preventive care medications

Human Immunodeficiency Virus Pre-Exposure Prophylaxis medications available at $0

Updated July 1, 2026

Under the health reform law (Patient Protection and Affordable Care Act), most private health plans must cover certain preventive care medications at 100% – without charging a copay, coinsurance or deductible.

In response to this law and a United States Preventive Services Task Force (USPSTF) recommendation, Optum Rx offers coverage of Human Immunodeficiency Virus (HIV) Pre-Exposure Prophylaxis (PrEP) at $0 when used for prevention.

If you have a higher chance of becoming infected with HIV but are not yet infected, the preventive care medications below are available at $0.

Most pharmacy benefit plans also cover these medications at a normal copay or coinsurance when they are being used for the treatment of HIV infection.

HIV PrEP medications currently available at $0

Drug name
Emtricitabine-tenofovir disoproxil fumarate 200-300mg tablet (generic Truvada) - Truvada available if unable to take generic
Tenofovir disoproxil fumarate 300mg tablet (generic Viread) - Viread available if unable to take generic
