Optum Rx® Vigilant Drug Program

High-cost brands with generics strategy

Effective July 1, 2026

The Vigilant Drug Program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

High-cost brands with generics strategy* – Excludes high-cost brands that have lost patent protection and have clinically equivalent, lower-cost generic alternatives.

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.
